

Let SamSM

Get the most out of your SAM container. Here's some general information to assist you in loading.

Lend A Hand.

Step 1

Start with heavy items like appliances or furniture.

Step 2

Fill open spaces with boxes or other items to provide stability.

Step 3

Continue placing lighter items on top to complete your first section.

Secure your stuff. Use loading straps to secure each section across the container. Items may also be secured individually to each side.

Additional Tips:

- Fill boxes completely and tape closed
- Distribute weight evenly from end-to-end and side-to-side
- Protect items with paper pads, furniture pads or bubble wrap
- Pack items as tight as possible; always stack from floor to ceiling
- Load mattresses last to complete the final section and provide overall load stability
- Do not apply excess force when securing straps to avoid damage to your items
- Secure last section with loading straps to prevent items from interfering with the door's operations
